DETAILED ACTION

An amendment of 2/22/07 amended the specification and claims 1, 3, 4, 7-14 and 45, canceled claims 2, 32-44 and 46-57, and added new claims 58-62.

5 Claims examined on the merits are 1, 3-14, 45 and 58-62, which are all claims in the application.

Specification

The amendment filed 2/22/07 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35

10 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the specification is unclear where there is support for the amendments to paragraphs 0002 and 0056.

15 Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C.

112:

20 The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

25 Claims 4, 7, 8 and 59-62 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not

Art Unit: 1657

described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Support is not found in the specification for a biaxially oriented polyethylene terephthalate (bio-PET) required by the claims. Additionally, support for new claims 59-62 is not readily apparent in the specification. The page and lines where the treatment of each claim is disclosed should be pointed out.

Claim Rejections - 35 USC § 112

Claims 1, 3-14, 45 and 58-62 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In last line of claim 1, there is not antecedent basis for "the non-luminescent composite microarray". In the preamble, "non-luminescent" has been deleted.

In claim 4, "substrate glass----" is confusing. Should "is" be recited after "substrate"? Additionally, in this claim and claims 7 and 8, "biaxially oriented polyethylene terephthalate (bo-PET)" is uncertain as to material required. This material and how it is prepared has not been described in the specification adequately.

Claim 58 is unclear how it differs from claim 3.

In line 2 of claim 13, "substantially wholly" is uncertain as to meaning and scope. How does "substantially" modify "wholly"? The

difference between "substantially wholly" and "substantially" and "wholly" is uncertain.

Conclusion

The claims are free of the prior art.

5 Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

10 A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action
15 is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
